**Pulse ShowerspAs Introduces Affordable,  
Luxurious, Multi-Head Shower Systems**  
*Self-contained, cost-effective showerspa system installs quickly,  
provides luxurious spa experience at a fraction  
of the cost of conventional spa systems.*

**May 6 , 2006 -- San Jose, CA – [Pulse ShowerspAs, Inc.](http://Pulse ShowerspAs, Inc)** is introducing a complete line of Pulse Showerspa systems at the 2006 National Hardware Show, in Las Vegas. Designed to transform the traditional shower into a luxurious spa experience, the Pulse Showerspa product line offers several high-quality, affordable alternatives to costly high-end shower systems. The company is exhibiting at Booth 22318.

Pulse ShowerspAs incorporate multi-functional/directional massaging jets that turn an ordinary shower into the kind of experience typically found at expensive day spas and luxury resorts. Designed for a retro fit application, remodel or new construction, the Pulse product line represents a perfect solution for home-builders, remodelers, interior designers and plumbing contractors looking for a new, high-quality, and, affordable shower system for their clients.

The Pulse system replaces the ordinary showerhead with an elegantly styled pre-plumbed panel of 4 - 6 hydro massaging body jets, "rain fall" or multi-function showerhead and hand-held showerhead.

Several models feature built-in shelves for soaps and shampoos, and adjustable showerheads for family members of all heights. Brian Edwards, president of Pulse ShowerspAs, said, "our customers are the kind of people who enjoy going to day spas and are looking for that kind of luxury in their home. The Pulse system offers the perfect combination of luxury, appearance, and quality components for the price."

The Pulse ShowerspAs System sets itself apart by offering a powerful combination of quality and affordability.

- The company offers [14 different models](#), ranging in price from \$650– \$850. Other leading shower systems typically start at \$1200 and up.
- The system is pre-plumbed for [easy installation](#) by a skilled do-it-yourselfer, plumber or authorized Pulse dealer.
- Pulse ShowerspAs feature high-quality components for years of trouble-free luxury.

"We built the Pulse ShowerspAs to provide the spa experience at your fingertips," said Edwards. "For instance, when you add conditioner to your hair, you can turn off the overhead shower, and turn on the jets so you stay warm and comfortable while the conditioner's working. The end-result is a high-quality product that's easy to install and use, and provides a luxurious experience at a great price." To schedule an interview during the show, or learn more about availability and dealer information, please contact Brian Edwards at 408.254.6665, or email [brian@pulseshowerspAs.com](mailto:brian@pulseshowerspAs.com).
