This valve and trim kit utilizes a pressure balancing mixing cartridge to ensure constant water temperature in response to changes in water pressure (e.g. flushing a toilet). The valve also comes equipped with an adjustable Hot Limit Safety Stop to reduce risk of scalding. The trim kit is equipped with a Friction-Fit™ Trim to provide a clean, sleek look without mounting screws. Now with an LED temperature display (3002 & 3004 models only).

- Durable brass body ideal for prolonged contact with water
- Includes Plaster Guard to be used as a guide during installation
- Includes tub spout cap
- Durable ceramic disc cartridge
- Ensures consistent water temperature to prevent scalding
- LED temperature display (3002 | 3004 models ONLY)
